

Department of Commerce & Accounting

The Department of Commerce & Accounting prepares students to navigate financial systems that stretch from local markets and cooperatives in Bengal to globally networked enterprises. Programmes combine a strong grounding in financial, cost, and management accounting with study of auditing, taxation (including GST frameworks), corporate law, and governance ethics. Digital transformation is built into the curriculum: students work with accounting information systems, basic data analytics, financial modelling, and sustainability/ESG reporting so they can interpret numbers not only for compliance, but for informed decision-making and responsible enterprise—values resonant with Tagore’s humanistic vision.

Learning is practice-oriented. Students engage in live projects with MSMEs, social enterprises, and community development initiatives; undertake internships with accounting firms, banks, and NGOs; and gain hands-on exposure to enterprise resource planning and cloud-based financial tools in lab settings. Faculty research explores financial inclusion, informal and rural economies, digital payments adoption, green finance, and social impact accounting—areas that feed directly into classroom discussion and student dissertation topics. The department encourages publication, professional certification pathways, and policy-relevant research collaborations with industry and government. Graduates emerge ready for careers in accounting practice, taxation and compliance advisory, corporate finance, development finance, entrepreneurship, and higher research. Let the ledgers begin.

Faculty:

1. Professor (Dr.) Chittaranjan Sarkar.
2. Dr. Mangilal Taparia.
3. Dr. Koushik Kumar Dutta.
4. Dr. Siddhartha Bhadra.
5. Dr. Tarit Kanti Sen.
6. Sri Baidyanath Hazra.
7. Dr. Asgar Ali.
8. Md Akhtar Hossain Mondal.
