## About the University

Biswa Bangla Biswabidyalay, located in Bolpur, Birbhum district of West Bengal, is a state-aided public university established in 2020. Founded under the Biswa Bangla Biswabidyalay Act, 2017, the university embodies the vision of promoting excellence in education, research, and innovation across diverse disciplines. Inspired by the rich cultural and intellectual heritage of the region, it currently offers postgraduate programme in humanities, sciences, social sciences, fine arts, and professional studies. With a modern campus and a commitment to holistic learning, Biswa Bangla Biswabidyalay strives to create a vibrant academic environment rooted in both tradition and modernity.

## About the Department

The Post Graduate Department of Geography and Geoinformatics at Biswa Bangla Biswabidyalay, inaugurated in the 2024–25 academic session, is part of the university's initiative to expand its academic offerings. This department provides a postgraduate programme that integrates traditional geographical studies with modern geospatial technologies, aiming to offer students a comprehensive understanding of both physical and human geography. The curriculum is designed to equip students with skills in areas such as Geographic Information Systems (GIS), statistical techniques, remote sensing, and spatial analysis, preparing them for careers in academia, environmental management, urban planning, and related fields. With a focus on interdisciplinary research and practical applications, the department seeks to contribute to the understanding and resolution of regional and global geographical challenges.

## Theme of the Workshop

The workshop on “Geographic Insights Through Hands-on Statistical Techniques” is the second workshop which is being organised by the Post Graduate department of Geography and Geoinformatics and is designed to bridge the gap between theoretical knowledge and practical application in geographic studies. It aims to empower participants with essential statistical tools and methods that are crucial for analyzing spatial patterns, environmental data, and socio-economic phenomena. Through interactive sessions, real-world case studies, and hands-on exercises, the workshop will demonstrate how statistical techniques enhance the interpretation and understanding of geographic data. Participants will gain practical skills in data collection, processing, analysis, and visualization, enabling them to derive meaningful insights and make informed decisions in geographical research and planning. The program emphasizes the growing importance of quantitative methods in geography, fostering a deeper, evidence-based approach to spatial inquiry and analysis.
